

Commercial Stove 6 Burner

Comes with 3 racks and must be returned clean.

To light the top burner pilots:

1. Make sure that all the burners are turned off before attaching tank.
2. Attach the propane tank and open the valve.
3. Remove the spider rings to expose the pilots and light them. (6 of them)

Turn the gas knob to release the gas to ignite the burners.

To light the oven pilot:

1. Remove the bottom kick plate below the oven door.
2. Use a flicker bicker (long lighter) to ignite the pilot. While the lighter is lit. Press the red button the release the gas for the pilot. Once the pilot is lit hold the red button for 15 seconds. Make sure that the pilot is still lit.
3. Turn on the oven to the desired temperature.

To turn off:

1. Turn all knobs to off position.
2. Turn valve off on the gas tank.
