

Hot Dog Grill - Easy Steps for Using Unit

1. Clean grill prior to operation. Just use mild soap and water and soft sponge.
2. Place fence on grill. Align the pins on the grill with the slots in the fence.
3. Turn on the on/off switch. Turn heat controls fully clock-wise to high position.
4. Pre-heat grill for 15 minutes.
5. Place pre-cooked product on grill between the fence rails.
6. Cook for 30 minutes and check for doneness (150 degrees F). Check with the thermometer supplied.

Frozen product will cook in approximately 30 minutes

Refrigerated product will cook in approximately 20 minutes.

Heat Controls

(2) Heat controls to cover the upper and lower zones. These controls have a positive OFF and are infinitely variable from low to high.

On/Off Switch

Provides power to the motor and the heat controls with a built in pilot light to indicate that there is power to the unit.
